Top Feature Drivers

Blood Pressure	35.3%
Cholesterol	33.1%
Age	31.6%

Precautions

- [High] Control Blood Pressure: Track blood pressure daily, reduce sodium intake, and follow clinician guidance on BP management.
- [High] Clinical Consultation: Book a physician consultation soon for full diagnostic evaluation and treatment planning.
- [Medium] Sleep and Stress Hygiene: Aim for 7-8 hours of sleep, daily hydration, and stress control practices such as walking or breathing exercises.

Recommendations

- Consult a physician for comprehensive cardiometabolic evaluation.
- Start strict blood pressure, glucose, and lipid monitoring.
- Adopt physician-guided exercise and nutrition plans immediately.
